THE LEGEND AT WORK

1930s

David K. Laidlaw begins a small clothing company in his parents' house in Brunswick, Victoria. To come up with a name, he approaches Jim Cushen, an independent advertising agent, and together they settle on Yakka, derived from the aboriginal word for work. The company narrows its focus to workwear and Hard Yakka is born.

1950s

Hard Yakka has now become the dominant workwear brand in the Australian market. With growing demand, the company makes the decision to expand. Eventually, they settle on a new manufacturing plant in Ballarat Street, Brunswick.

1940s

The Hard Yakka name becomes synonymous with quality, toughness, and durability. The business grows into an Australian institution and it's not long before Hard Yakka opens a new manufacturing plant in Sunbury, which is converted from an old army hall.

1960s

Like its name suggests, Hard Yakka is tireless in its efforts to improve and evolve the product. This quickly translates into further growth and increased demand. Before long, the company builds a new manufacturing plant on six acres of land in Broadmeadows, which becomes the new headquarters.

1970s

Already an integral part of the Australian fabric, Hard Yakka cements its position as an Aussie icon with the launch of the famous 'Railway' commercial. Featuring the famous Hard Yakka chant, written by Mike Brady, it becomes an instant hit with the Australian public.

Staying true to the spirit of its founding fathers, Hard Yakka continues to look for new and better ways to do things. The company introduces an impressive range of Hard Yakka safety and non-safety footwear, which kicks goals. The decade also launches the unforgettable 'Shearing' commercial.

1990s

1980s

With a name like Hard Yakka, there's no time for rest. The company expands its operations over the Tasman and launches the iconic brand in the New Zealand market. It also introduces the famous 'Haulpac' commercial, which becomes as iconic as itself.

2010s

Hard Yakka continues to grow and innovate in the workwear category. The company introduces several new lines, such as 3056: Born in Brunswick, a fashionable range of functional workwear. It's a long way from its humble beginnings but Hard Yakka has become one of the most recognised brands in the country, and one of the largest suppliers of workwear in the Southern Hemisphere. There's still much to be achieved and so the hard work continues.

OUR RANGES

In this Hard Yakka catalogue, you may notice some new names for Hard Yakka products. The Hard Yakka ranges have been realigned to reduce complexity and to make it easy to find the product you need. Now reduced to 8 ranges, Hard Yakka have moved away from the category names of Industrial, Generation Y and Hi-Visibility in order to bring you a simplified offer. A new category name, Foundations, has been introduced for our basic products. You will find our Generation Y workwear here as well as Hi-Visibility and Industrial workwear. For further information regarding specific products, the quick reference guide at the back of this catalogue will help you see the changes to product naming conventions at a glance.

FOUNDATIONS

Hard Yakka Foundations is our everyday basic range of workwear. It's tough, uncompromising and just like you, gets on with the job. Made for the long haul, Foundations is honest, heavy-duty workwear that thousands of workers rely on every single day of the week. With everything you need and nothing you don't, we guarantee that you're only paying for the essentials when you buy our Foundations workwear.

LEGENDS

Hard Yakka Legends is the toughest and it's from our ultimate range. It's useful workwear with multiple purpose pockets. Legends are made with the toughest materials around for more comfort, protection and strength, every day. Hard Yakka Legends is workwear that's built to last longer. Try them on and you'll instantly know that Hard Yakka Legends are built to last longer.

KOOLGEAR

Hard Yakka Koolgear breathes as you do. By drawing out perspiration, it keeps you as dry as possible all through the year. Designed for comfort and breathability, you can guarantee that the moment it starts heating up, Hard Yakka Koolgear won't slow you down. Even though it's made with mesh ventilation and lightweight materials, Koolgear loses none of Hard Yakka's famous durability and toughness. Put Hard Yakka Koolgear on at the start of a hot day and you can be confident that it will stick to the task and not to you.

PROTECT

Hard Yakka PROTECT is our most serious range of workwear and your last line of defence against flash fire and arc flash. Like all Hard Yakka ranges, it's tough, comfortable and practical workwear, but it really delivers on protection. Partnering with Bulwark iQ Series®, TECGEN™ and Tecasafe® Plus, Hard Yakka PROTECT provides products which deliver superior comfort and design innovation without compromising your safety. Put on Hard Yakka PROTECT workwear and you're buying yourself a few vital seconds that could end up saving your life. Refer to separate brochure for further detail.

3056: BORN IN BRUNSWICK

Since the 1930s Hard Yakka has made tough, no-nonsense workwear. Hard Yakka 3056 continues in this style and looks every stitch as impressive as it performs. Bringing attitude to functional workwear, the 3056 range features a new fit and colours inspired by today's fashion. Inspired by style, 3056 is made the only way Hard Yakka know - hard working and hard wearing.

WOMEN'S

Hard Yakka Women's range offers everything you'd expect from our workwear, but in a tailored feminine fit. Even though our Women's clothes are cut so flatteringly, they lose none of the durable, comfortable and practical attributes that have made Hard Yakka the uniform of the trade. Our Women's range is kitted out with all the best elements of our workwear, so you are guaranteed to find extra pockets and enhanced materials wherever they're needed. Put on Hard Yakka Women's workwear and you'll look and feel the part.

ACCESSORIES

Hard Yakka Accessories perfectly complement the rest of our rugged workwear. Arm yourself with our gloves and kneepads and you're buying the same level of safety that Hard Yakka always delivers. The gloves give you added grip and extra protection while the knee pads cushion and protect your knees against any work surface. Complete your kit with Hard Yakka belts and socks to give you comfort and durability throughout the working day. Put on any of our accessories and you know that you're prepared for whatever's coming your way.

FOOTWEAR

Hard Yakka Footwear is our most protective range to date. Available in shoes, joggers and boots, they're as comfortable on your feet, for as long as you are on your feet. Made to withstand the worst the workplace can throw at them, our footwear is tough and rugged. Add in our shock absorbent innersoles with anti-static features, plus the latest reinforced toecaps and our footwear is fully equipped for the harshest conditions. Whatever job you've got to do, you'll get all the support you need with Hard Yakka Footwear.

A GUIDE TO OUR WORKWEAR ICONS

UPF RATING

An Ultraviolet Protection Factor (UPF) rating for Ultraviolet Radiation transmitted through a fabric onto the skin. Look for garments with a UPF 40 or 50+ rating to be assured of excellent protection.

TRIPLE SEAMS

Triple stitching assists with the reinforcement of the garment in stress points to make it extra durable.

HI-VISIBILITY DAY

A garment that uses high-visibility materials for outdoor use only. The high-visibility material must encircle the upper torso. Complies with AS/NZS 4602.1:2011 High-Visibility Safety Garments Class Day.

WATERPROOF

Garments made of waterproof fabrics and seam sealed to ensure protection from the elements.

HI-VISIBILITY DAY/NIGHT

For use in day, night, dawn, dusk or in poor weather conditions where there is illumination from headlights. Complies with AS/NZS 4602.1:2011 High-Visibility Safety Garments Class Day/Night.

EASY CARE

Garments with the Easy Care icon are easy to look after in terms of washing and ironing, and will look smarter for longer.

HI-VISIBILITY NIGHT

A garment designed for night use using retro reflected light. Complies with AS/NZS 4602.1:2011 High-Visibility Safety Garments Class Night.

MOISTURE MANAGEMENT

Fabrics that wick moisture away from the skin to the fabric surface and help it to dry faster. This keeps you cooler and more comfortable so you can get on with the job.

COOL FLOW

Lightweight cotton fabrics and design features like ventilation in the back yoke of shirts, polos, pants and shorts helps improve airflow. This assists with vapour and thermal management to keep you cooler.

INDUSTRY GUIDE

WHITE

PAINTERS
PLASTERERS
HOSPITALS

Most painters use white paint, so wearing white helps because it doesn't contrast or show up white paint drops. It's also easy to bleach and remove paint from clothing.

KEY ITEMS - Y02901 Legends Xtreme Pant White, Y02508 Foundations Tradesman Cotton Drill Trousers White, Y07500 Foundations Cotton Drill Shirt White

NAVY

PLUMBERS
ELECTRICIANS
MECHANICS

Navy is traditionally a colour, which hides dirt, grease and grime and allows the wearer to maintain a professional appearance.

KEY ITEMS - Y02500 Engineered Generation Y Cotton Drill Trousers Navy, Y07502 Engineered Generation Y Cotton Drill Shirt Short Sleeve Navy

KHAKI

CARPENTERS
LANDSCAPERS
CONSTRUCTION

Khaki is generally a colour worn by those who work with wood or earth as dirt and wood shavings are disguised.

KEY ITEMS - Y02800 Legends Cotton Panama Weave Trousers Khaki, Y07554 Koolgear Cotton Twill Vented Shirt Short Sleeve Khaki

BLACK

ALL TRADES

Similar to the Navy colour above, black hides grease and generally most dirt, and allows the wearer to maintain a professional appearance.

KEY ITEMS - Y02800 Legends Cotton Panama Weave Trousers Black, Y07700 Foundations Poly Cotton Pique Knit Polo Short Sleeve Black

LIGHT BLUE

MECHANICS

Mechanics need to ensure that their workwear is comfortable and lightweight yet protective. Buttons and studs should be covered to ensure they do not catch or scratch the car or motorcycle paint work.

KEY ITEMS - Y00015 Foundations Poly Cotton Coveralls Light Blue

GREEN

AGRICULTURE
COUNCILS

Green is a natural colour traditionally associated with those who work outdoors in agriculture. Councils also use this colour to distinguish their workforce.

KEY ITEMS - Y01555 Foundations Tradesman Cotton Drill Action Back Overall Green

HI-VISIBILITY STANDARDS

Hard Yakka Hi-Visibility workwear meets relevant Australian and New Zealand Standards, AS/NZS 4602.1:2011 for high-visibility safety garments.

**HI-VISIBILITY DAY
Y11630**

**HI-VISIBILITY NIGHT
Y07227**

**HI-VISIBILITY DAY/NIGHT
Y07978**

IMPORTANT LIMITATIONS OF USE

Under no circumstances should Class Day (D) garments be worn for visibility purposes at night. Any markings, attachments, screen prints or other alterations, accessories or coverings not incorporated into the original product may not only void the garment's compliance with the appropriate standard, they may also put the user at risk by reducing the high-visibility performance of the garment. The high-visibility properties offered by Hard Yakka Hi-Visibility garments may be lessened due to normal wear over time or if the fabric is stretched. Hard Yakka Hi-Visibility garments using natural fibres have been tested and comply to Australian Standards AS/NZS 4602.1:2011 High-Visibility Safety Garments in dry conditions. Wet conditions may alter the compliance of these fabrics to the standard and appropriate care should be taken.

According to the Australian Standard, materials classified as high-visibility for daytime use must be manufactured from a durable fabric of woven or knitted cotton or equivalent man-made fibre that contains a fluorescent pigment or other high-visibility dye, or to which a fluorescent plastic coating has been applied. These materials are subjected to the following tests and must meet or exceed specified minimum requirements for:

- Daylight colour and luminance factor
- Colourfastness to light
- Colourfastness to washing
- Colourfastness to perspiration
- Colour retention testing

In some cases, for safety reasons, a garment must be made from a natural fibre incapable of retaining a fluorescent colour. In these instances, the material is tested for luminance for non-fluorescent materials. Alternatively, man-made fibres are generally capable of retaining a fluorescent colour and are therefore tested for luminance for fluorescent materials. The fabrics used in the manufacture of Hard Yakka Hi-Visibility workwear are tested and must meet or exceed specified minimum requirements for:

- Chromaticity
- Luminance for fluorescent materials
- Luminance for non-fluorescent materials

GARMENT INNOVATION

Fabric quality has been, and always will be paramount for Hard Yakka. Only the best is good enough to bear the Hard Yakka name. To ensure all Hard Yakka garments deliver the kind of quality, toughness, comfort, durability and functionality that will truly stand the test of time, they're subjected to a range of rigorous tests including abrasion tests, wash tests, perspiration, seam and pilling tests, tensile strength tests and colour tests. Of course rigorous testing is only one of the reasons that nothing's tougher than Hard Yakka. An ongoing commitment to innovative product development continues to keep Hard Yakka at the forefront of workwear fabric technology and design. The product development team constantly search the globe for new ways to make workwear even more comfortable, safe and functional. The result is regular upgrades to existing workwear and a constant stream of new breakthrough designs. At Hard Yakka, the hard yakka never stops.

COLOUR TESTS

UPF RATINGS

Hard Yakka knows a thing or two about Australia's unique work conditions. That's why most Hard Yakka workwear is rated UPF 50+ for excellent protection against the harsh Australian sun. In fact, as you can see from the table below, when it comes to protection from harmful UV rays, Hard Yakka is a tough act to follow. All Hard Yakka workwear has been tested by independent, accredited laboratories and rated according to Australian/New Zealand Standard AS/NZS 4399 Sun Protection Clothing Classification. The following important factors should also be considered when selecting your Hard Yakka workwear. The UPF rating is for the fabric only and does not take into account the design of the garment. For outdoor workers, Hard Yakka recommends garments that cover the maximum area of the body. For example, Hard Yakka workwear with full arm and leg coverage should be selected. To ensure complete protection, a hat and sunscreen should also be worn. Finally, the UPF protection offered by the garment may be lessened if the fabric is stretched, wet, in close contact with the skin, or worn out due to wear and tear over time.

UPF RATING	RATING UVR PROTECTION CATEGORY	EFFECTIVE UVR TRANSMISSION
15, 20	GOOD PROTECTION	6.7 TO 4.2
25, 30, 35	VERY GOOD PROTECTION	4.1 TO 2.6
40, 45, 50	EXCELLENT PROTECTION	< 2.5

A GUIDE TO OUR FOOTWEAR ICONS

STEEL SAFETY TOE CAP

All Hard Yakka footwear complies with Australian and New Zealand standards AS/NZS 2210.3:2009.

GOODYEAR WELT

The process of making shoes is referred to as Goodyear Welt construction, as the machinery used for the process was invented by Charles Goodyear, Jr in 1869. The genuine welt system provides great breathability, allowing perspiration to pass from the foot through to the insole cavity.

STEALTH II COMPOSITE TOE CAP

50% lighter than steel, non-metallic, non-magnetic, non-conductive and anti-corrosive. Its lightweight construction decreases foot fatigue. All Hard Yakka footwear complies with Australian and New Zealand standards AS/NZS 2210.3:2009.

EVA MIDSOLE

Ethylene Vinyl Acetate (EVA) is popularly known as expanded rubber or foam rubber. EVA is typically used as a shock absorber as it provides excellent cushioning and is a lightweight material.

TECTUFF® TOE GUARD

The proprietary TecTuff finish is extremely durable and resistant. The TecTuff finish is also extremely thin, allowing air and moisture vapour to pass through the finish. The finish is so thin it can allow light to pass through, yet it remains exceptionally abrasion resistant and impenetrable so even when oil or fuel come in contact with TecTuff, they can be easily wiped away.

PORON® INNERSOLE

An expandable polymer provides excellent cushioning and rebound. Poron offers greater shock absorption in the insole and therefore less stress and jarring to the feet and joints. Manufactured from materials that won't shrink, become brittle or crack with age.

ANTI-STATIC

Boots with Anti-Static properties are designed to reduce the build up of excess static electricity by conducting body charge to the ground. This offers a level of protection against ignition hazards such as flammable materials and gases.

DUAL DENSITY PU / TPU

Thermoplastic polyurethane outsoles have many useful properties including elasticity and resistance to oil, grease and abrasion. The polyurethane midsole provides additional comfort and energy rebound. Heat resistant to 130 degrees Celsius.

COMFORT WALK SYSTEM

The advanced design includes a sponge rubber heel and forefoot insert that provides improved cushioning while reducing boot weight, jarring and foot fatigue.

DUAL DENSITY PU / RUBBER

Hard Yakka rubber outsoles are tough, hard wearing, and oil and grease-resistant. The polyurethane midsole provides additional comfort and energy rebound. Heat resistant to 300 degrees Celsius.

ACHILLES FLEX

The unique design of the accordion-style flex point in the Achilles area allows the boot to flex where you do, preventing restriction in movement or pain from the Achilles tendon.

AIRPORT FRIENDLY

No need to take off your boots every time you travel. The entire boot is non-metallic, including the toe caps, which can be x-rayed, will not rust and will not transmit electricity. This allows you to move through security environments without triggering metal detectors.

30 DAY COMFORT GUARANTEE

Our workboots have been engineered to provide maximum comfort. After a careful study of the Australian foot anatomy, we have designed Hard Yakka boots with a wider last, sole and toe cap. We are so confident you will love these boots that they come with a 30-day comfort guarantee.

FOOTWEAR LEATHERS

ONE OF THE MOST IMPORTANT MATERIALS USED IN HARD YAKKA FOOTWEAR IS THE UPPER LEATHER

Hard Yakka leathers are carefully selected for their suitability in industrial safety footwear. The softness and absorbency of leather assists in the control of temperature for feet, an important factor in comfort within an industrial environment. Leather has the ability to breathe through numerous small pores, allowing perspiration to diffuse, while at the same time restricting the entry of fluids, including water.

Leather also provides a significant benefit by trapping air between the fibres and becoming a thermal insulator. This characteristic is a barrier to external heat or cold damp and greatly assists in raising the level of comfort for the wearer.

Another important feature of leather is its flexibility and 'give' as well as the capacity to stretch either in wear or by insertion of devices inside the boot or shoe. Hard Yakka leathers have been selected because of their softness and pliable surface.

FULL-GRAIN LEATHER is considered amongst the best quality leather you can buy. Hard Yakka full-grain leather is made using premium cow hides, which is one of the most breathable leathers you can wear.

KIP LEATHER is soft and supple cow hide. It is stronger, smoother and more durable than other types of leathers. Kip Leather tends to be lighter in weight as compared to other leathers.

NUBUCK LEATHER is made from full-grain cattle hides that have been sanded or buffed on the grain side to give a slight texture (short fibres) producing a velvet-like surface. Hard Yakka Nubuck is carefully selected from the thick side of cattle hides ensuring our boots meet 2.2mm thickness requirements for durability.

SUEDE LEATHER is made from the underside of cattle hides. Splits from thick cow leather have a woollen finish due to the nature of its fibre. As suede does not include the tough exterior skin layer, it is less durable but softer than standard full-grain leather.

RAMBLER LEATHER is created by applying a pigmented finish to the surface of the leather. The process is completed by embossing or printing a grain pattern onto the surface.

MEASURING GUIDELINES

Each tailor and patternmaker has his or her way of measuring. This fitting guide will help to ensure a consistency of approach.

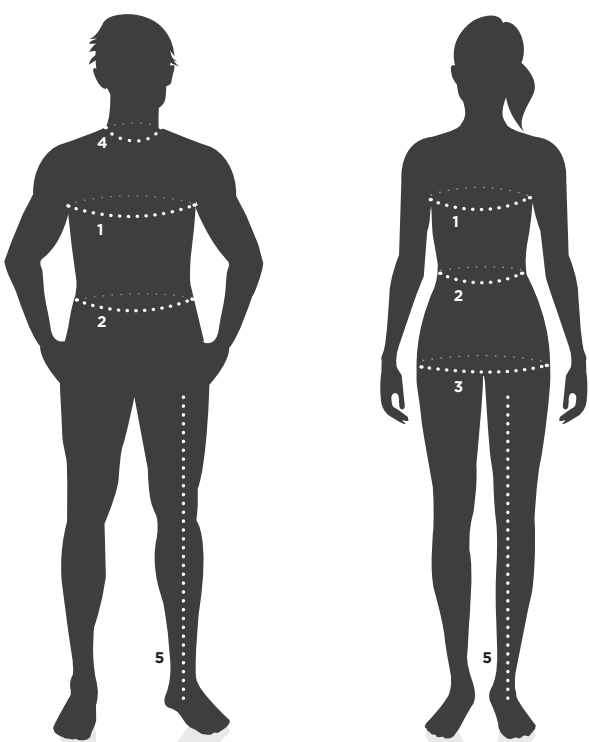

- Do not take your measurements yourself
- Ask a professional dressmaker or tailor to take your measurements for more accuracy
- Wear light clothing as thicker garments like jumpers and jeans will add to measurements
- Remove items from pockets such as wallets in the back hip pocket
- Measure with the tape flat against the body
- Do not hold the tape too loose or too tight
- Do not put fingers under the tape

1. CHEST/BUST CM
 Measure around the body across the fullest part of the chest, keeping the tape level and straight.

2. WAIST CM
Women Measure around the natural waistline, keeping the tape level and straight.
Men Measure the waist where they wear their pants.

3. HIP/SEAT CM
Women only Measure at the widest point (approx 20-23cms) below the waist. At this position the tape should slide easily up, down and over the bottom.

4. NECK/COLLAR CM
Men only Measure the circumference at the base of the neck, where a shirt collar would sit or using a well fitting shirt, lay flat on table, measure from centre of button to centre of button hole.

5. IN-LEG LENGTH CM
 Measure from crotch to floor without shoes.
